*More information on the Value-Added measure produced by The Centre for Evaluation and Monitoring can be found at www.cem.org. As a rough guide, the recorded number gives a measure of how well the students have done, on average, against what their ability suggested that they might achieve against students of similar ability nationally. For example, a positive result of 0.5 suggests that, overall, the students scored, on average, 0.5 grades higher in each subject than other students of similar ability nationally.
